Infection Prevention in Health Care Facilities

When: April 11-12, 2013
Sept. 26-27, 2013

Where: Michael F. Sorrell Center
University of Nebraska Medical Center Campus
Omaha, Nebraska

PURPOSE

To provide current knowledge and skills necessary for infection preventionists to function effectively in various health care settings.

TARGET AUDIENCE

Nurses and other health care professionals dealing with infection prevention issues.

FORMAT

The course will include lectures, discussion and educational activities. Course fees include lunch, breaks and materials.

Co-provided by
**The Nebraska Infection Control Network
& Clarkson College**

This course has been offered biannually since
1985 by the NICN

Clarkson
College
Prepare to be the best.

COURSE OBJECTIVES

Upon successful completion participants will be able to:

- › Review the components of an infection prevention program.
- › Identify common health care associated infections, resistant organisms and problem infections.
- › Interpret current regulations and standards.
- › Describe methods of infection prevention and control in a variety of health care settings.
- › Discuss methods of surveillance, data analysis and infection rate calculation.

SESSION TOPICS

Day 1: Infection Prevention Overview
