About CareMore

CareMore started in 1993, caring for older adults as a medical group. The name embodied the philosophy that inspired a proactive model of care with a caring touch and a focus on wellness. Today, CareMore now serves Medicare and Medicaid eligibles as a health plan through our provider partners and as a Medical Group.

CareMore Health System

The CareMore Health System is a nationally leading healthcare delivery system with operations in eight states (Arizona, California, Georgia, Iowa, Nevada, Ohio, Tennessee, and Virginia). Our system is focused on the care of older adults and other vulnerable populations (e.g., Medicare and dual-eligibles). Since 2013, CareMore has expanded its service areas to include Virginia, Ohio, Tennessee and Iowa. In these markets, CareMore acts as the healthcare provider and partners with other Anthem-owned insurance companies to deliver our unique model of care to patients in these new service areas.

In all other markets, we act as both the payer and provider. This arrangement enables us to continuously pursue thoughtful innovation of our clinical model.

Preceptor Program

The CareMore Preceptor Program links preceptors with students in a mentor-student relationship. Students are matched with a preceptor based on respective field, location, and availability. We collaborate with a number of approved schools on a tri-yearly basis to provide students hands-on training, credit hours to complete their degree program, and a thorough knowledge of what it takes to become clinical practitioners. Through our Preceptor Program, students put into practice what they have learned inside the classroom alongside a mentor.

At CareMore, we are not satisfied with traditional healthcare delivery, but we have a vision for how it should be. Join us in revolutionizing the way healthcare is delivered!
